INTRODUCTION

This is an Educational Website named "BLOOM" created using HTML and CSS.This is a huge interactive platform to present various information. Bloom is a user friendly website in which students from all over the world can study and share their skills. Students can clear their doubts and gain knowledge from well experienced and qualified tutors. Through this website , people can know about contact details,feedbacks,fee structure ,courses available …

OBJECTIVES OF THE PROJECT

The objective of the project is to design a user friendly educational website named "BLOOM" using HTML and CSS which provides distant learning in modern conditions. This website helps people to get information about courses available , fee structure , feedbacks , and many other features.

FEATURES OF THE PROJECT

Our website consists of Navigator at the top of the website which helps in guiding the people to other web pages . We created various modules and linked them to their designated websites . The modules created in the website are:

Home page: Home page is the starting point of the website. It is the main web page of a website. The main function of a homepage is to direct users around the site.

About us: The objective and information of the website is found here.

Gallery: This webpage shows the images of various books and courses which attracts the users.

Login: Helps the users to save their information in the website.

Contact : This page helps the users to access the contact details.

Search bar : Helps to navigate throughout the UI of the page.

SCREENSHOTS OF THE PROJECT

About Us

We are bloom, here are we to enrich your power on the compatibility of your life upon your knowledge.

Hanging towards our passion is the wealth, it is the most commn thing which gives us happiness in every second of the moment in the world. So about to explain the concept very clearly to you and the tutor's we hired are the one who expert in the technologies. Feel free to get into the passion which is the boost for you.

Tutors

"I'm proud to wake up knowing my work is helping people around the world improve their careers and build great things. While being a full-time instructor is hard work, it lets you work when, where, and how you want."

★★★★

Joseph Vijay

"Bloom has changed my life. It's allowed me to follow my passion and become a teacher I love to see my students succeed and hear them say they've learned more, quicker, from my courses than they did in college. It's so humbling."

★★★★

Surya

Teaching on Bloom has provided me with two important elements: the opportunity to reach more learners than I ever would be able to on my own and a steady stream of extra income."

C Sharp

Future to be the perfect

C# (C-Sharp) is a programming language developed by Microsoft that runs on the .NET Framework. C# is used to develop web apps, desktop apps, mobile apps, games, etc.

C++

Future to be the perfect

C++ is a high-level general-purpose programming language created by Danish computer scientist Bjarne Stroustrup as an extension of the C programming language, or "C with Classes"

C

Future to be the perfect

C programming language is a procedural and general-purpose language that provides low-level access to system memory.

C Sharp

Future to be the perfect

Go is a statically typed, compiled programming language designed at Google by Robert Griesemer, Rob Pike, and Ken Thompson. It is syntactically similar to C, but with memory safety, garbage collection, structural typing, and CSP-style concurrency.
